

PRESS RELEASE

Active Tools International, January 2010

RALLY DRIVERS CHOOSE ATI TIRE SEALANT

As rookies in this year's Monte-Carlo Rally Historique, the Danish brothers Mark and Kore Berg have done everything in their power to get a head start over the more experienced rally drivers. So when their mechanic told them about the Tire Sealant from Active Tools, they immediately took action.

'We instantly decided to take out the spare tire and replace it with a few bottles of Valve-Out Tire Sealant. Without the spare tire, our car is now about 10 kilos lighter. Also, we don't have to struggle with a spare tire, but simply squeeze the sealant into the tire, use our on-board compressor to top up with air, and drive on. The time factor is decisive for us'.

Claus Iversen, Sales Manager for Active Tools' European aftermarket, is very pleased about the opportunity to provide Tire Sealant to a car participating in the historic rally.

'Although our Sealant is very efficient and easy to use, I of course hope that Mark and Kore will avoid puncturing all together. However, in case they do have a run of bad luck, our Tire Sealant will get them back on the road again in a matter of minutes'.

The Berg brothers drive a Porsche 911 Carrera 3.0 from 1976 which is enlisted as car number 277.

The 13th Monte-Carlo Rally Historique takes place from 28/1 to 3/2 2010.
